This file describes how to perform an INF install on Windows 2000 or Windows XP.

==
IMPORTANT NOTE:

These drivers have not been submitted to Microsoft's WHQL (Windows Hardware Quality Labs)
for certification. Depending on how your Windows 2000 (or Windows XP) installation was set up,
you may have to change the verification setting for the Microsoft Digital Signature on drivers.

To check/alter your setting, click on:

   START-> Settings-> Control Panel-> System-> Hardware(tab)
   Then click on the DRIVER SIGNING button.

 Either the WARN or IGNORE setting must be selected for this installation to work.
If the BLOCK option is selected, the driver installation will fail.

 If you have questions or problems, please contact your system adminstrator.
==

To properly install your PostScript printer driver (PPD) please follow the steps below:

1) Launch the AddPrinter Wizard from the START menu.
    > Select START-> Settings-> Printers & Faxes
    > Click on "Add a Printer" or the AddPrinter icon
    > Click NEXT.

2) Select LOCAL or NETWORK, depending on how the printer is connected to your system.

3) For a LOCAL printer, select the port. For a NETWORK printer, enter the printer path/name or browse to it.
   Select any additional/option items for your location as needed. This may vary depending on your local and/or
   network setup.

4) When the list of Manufacturers and Printers appears, click on the HAVE DISK button.

5) Click on the BROWSE button. In the window, browse to the directory/folder created by the self-extracting
   setup program (Default is C:\xante_dr)

6) Select the **.inf** file (e.g--**xt__2Mxp.inf)**.

7) Click OK. A printer listing should appear in the window. Select the printer you wish to install, and click on
   NEXT.

8) Type in the name you wish to use to identify your printer, then click NEXT.

9) Select the SHARING option of your choice, then click NEXT.

10) Print a Test to test the new driver by choosing YES. Click NEXT.

11) Click FINISH.

NOTE:
If you have set your MS Digital Signature verification to the WARN option, you will get an additional window asking if
you wish to install these drivers. Click on "Continue Anyway" to complete the installation.
